

Looking for domestic suppliers? Consider Web Industries.

Medical Contract Manufacturing

Web Industries is an industry leader in providing contract manufacturing services for flexible materials – from slitting, spooling, printing, laminating, die cutting, assembly and packaging to complete supply chain management solutions.

Trusted by top-tier medical device companies for over 35 years.

We have a long history of applying our expertise, innovative thinking and creative problem solving to help reduce time to market, drive costs down and continually improve processes to maximize product success.

Our 6 domestic facilities offer:

- Nearly 40 precision converting and manufacturing lines
- Modular and automated processes
- Medical-grade materials expertise
- Prototype to commercial-scale production capability
- Controlled manufacturing environments, including clean and dry rooms
- Biochemistry capabilities for products with active components
- Strategic domestic manufacturing redundancy
- ISO 13485 and 14001
- cGMP compliant and FDA-registered

What can we do for you? Let's talk.

We're already supporting several prominent medical device companies in their move to on-shore their manufacturing.

And we stand ready to help you.

Call us at 508.573.7979 to discuss the possibilities.

Materials expertise:

- Specialty medical materials
- Nonwovens
- Custom laminates
- Films and plastics
- Papers and membranes
- Inks and coatings
- Adhesives and resins
- Foils and metals
- Composites and fibers

Application experience:

- Medical disposables, such as gowns, face masks and face shields
- Testing strips
- Lateral flow immunoassay (LFI) devices
- Clinical lab diagnostics
- Wound care
- Microfluidics
- Wireless monitoring patches
- Multi-layer insulation blankets
